

TRAINING ASSET INVENTORY

5.1 GENERAL

This section provides an accounting of the training ranges and training areas used by the Indiana Army National Guard (INARNG). Seven categories of ranges have been developed under the Range and Training Land Program (RTLTP) initiatives and are shown in Table 5.1, Range Categories. These categories are used to more precisely account for and predict range usage at the separate installations.

In the detailed synopsis of ranges starting at paragraph 5.2, facility category codes (FCCs) are used for each of the assets. These are not the same as the “categories” in Table 5.1. Category codes are based on Army Regulation (AR) 415-28, *Department of the Army Real Property Category Codes*, and are part of the real property system maintained by the Construction and Facilities Management Office (CFMO) and at the installations where the facilities are used.

A list was compiled of all of the INARNG’s available training assets (ranges, maneuver areas, and other training facilities) using the following resources: the latest update of the Defense Installation Ranges and Training Area (DIRT) database, RTLTP guidelines, range regulations, facility definitions, and FCCs. Criteria for the range categories can be found in Table 5.1. For areas that may have multiple uses, such as nonduddled impact areas and / or maneuver training areas, the appropriate FCC is assigned based on the primary use of that area. Primary use is determined by major use, mission related factors, or other reasons determined by the installation. Local training areas (LTAs) used by the INARNG are depicted in Exhibit 5.1, Local Training Area and Armory Map, INARNG.

Table 5.1
RANGE CATEGORIES

Category	Description
Basic Weapons Marksmanship Ranges	Includes rifle, pistol, grenade launcher, light antiarmor, sniper, shotgun, and machine gun.
Collective Live-Fire Ranges	Infantry squad and platoon battle courses, defensive and offensive live-fire ranges, multipurpose range complex-heavy and light (MPRC-H and MPRC-L) (capable of training gunnery tables IX through XII), combined arms live-fire exercise (CALFEX) ranges, specified aerial gunnery complexes.
Direct Fire Gunnery Ranges	Tank, mechanized infantry, and engineer Tables I through VII - include subcaliber and gunnery Tables I-IV ranges.
Indirect Fire	Field artillery and mortar firing positions, air defense artillery ranges, and observation posts.
Special and Other Live-Fire Ranges	Demolitions, hand grenade, claymore, infiltration courses, medium and heavy antiarmor weapons, etc.
Maneuver Training Areas	Training area for light, amphibious, and heavy training.
Other Specified and Scheduled Nonfiring Training Facility or Land	Bivouac sites, assembly / staging areas, drop zones, airstrips, landing zones, etc.

The INARNG has access to the following training facilities at Camp Atterbury:

- 24 basic marksmanship ranges
- 5 collective live-fire ranges
- 3 direct fire gunnery ranges
- 83 indirect firing points: 16 mortar, 67 artillery, 5 OPs
- 2 demolition ranges (1 light, 17921; 1 heavy, 17970)
- 63 light maneuver training areas,
- 46 heavy maneuver training areas
- 5 land navigation courses
- 6 personnel / equipment drop zones
- 2 obstacle courses
- 1 rappel tower

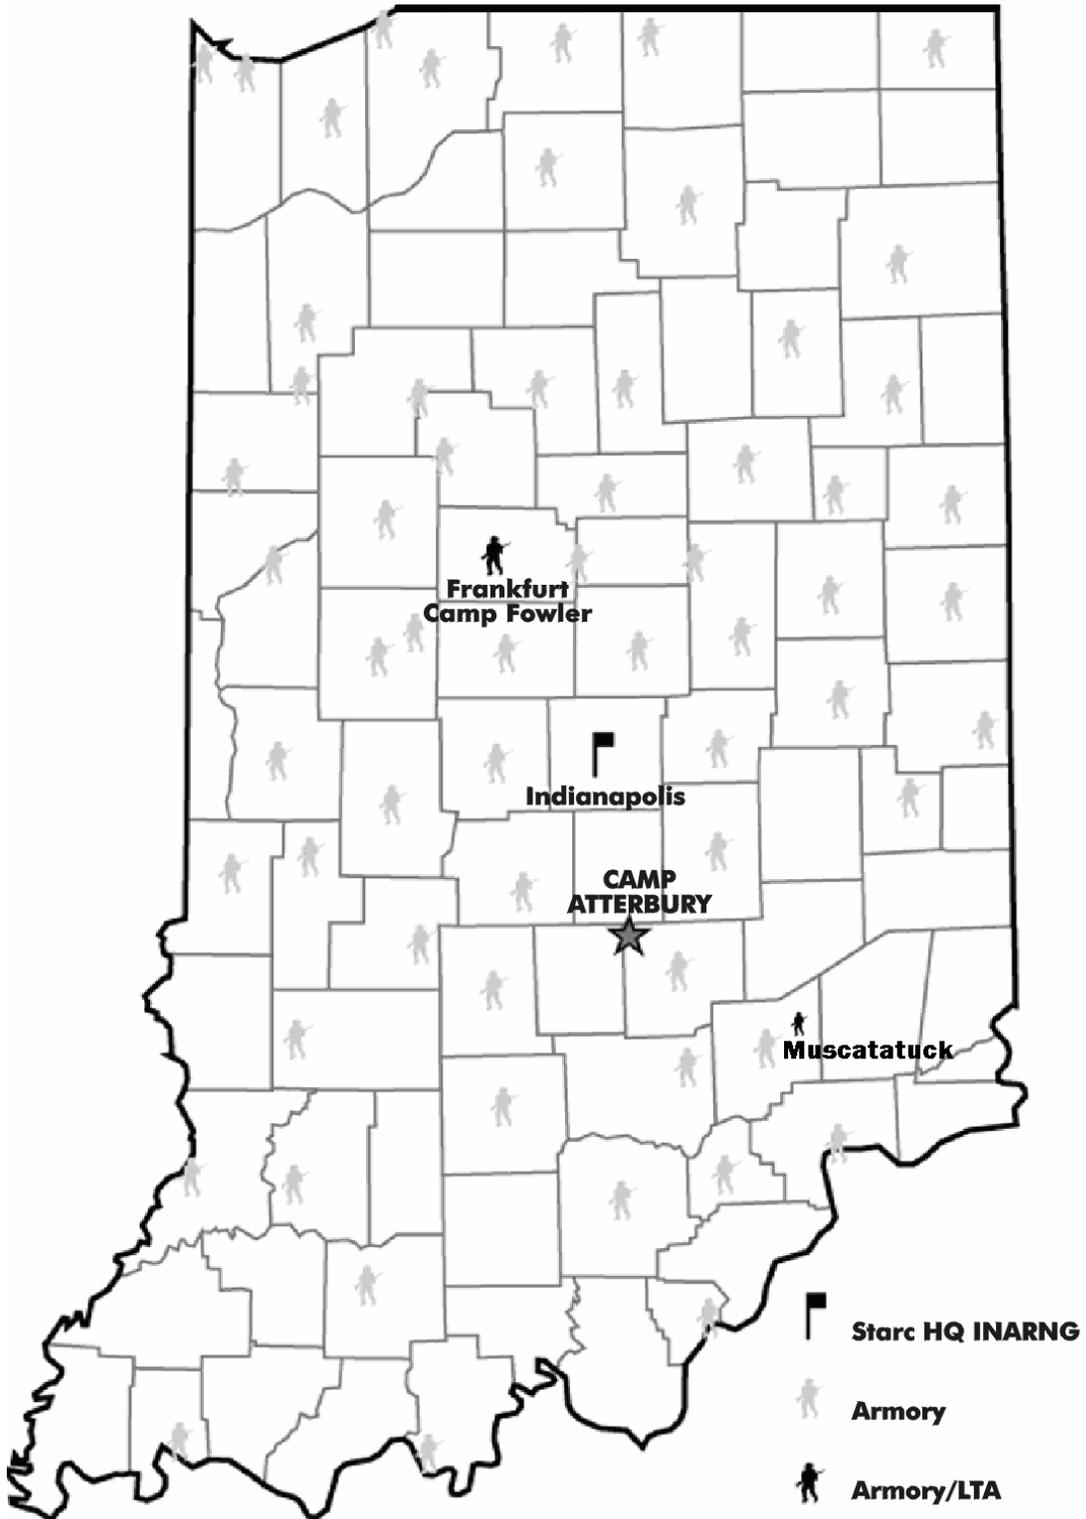

Many of the range assets are constructed to current Training Circular (TC) 25-8 standards. Camp Atterbury has 134.33 square kilometers (km²) (33,194 gross acres) within the installation boundary. The gross acreage figures used in this document are derived from ARCVIEW®, a geographical information system (GIS). Of the gross area, 103.95 net km² (25,686 net acres) are available for maneuver training. Of the net training area acreage, 48.82 km² (12,063) are considered available for light maneuver training, and 55.13 km² (13,623 acres) are classified as heavy maneuver training areas. There are 32.98 km² (8,149 net acres) not available for maneuver training use. The duded impact areas consist of 22.97 km² (5,675 acres) and account for the majority of the unavailable area. Other off-limit or restricted maneuver areas consist of the cantonment area, direct fire ranges, old landfill, old ASP location (TSIRT), bivouac sites, airfield, water utilities, POW Chapel historical site and the ASP with safety buffer. One hundred percent of the maneuver area is available for use by training units. Camp Atterbury also uses 239 acres of contiguous land (Area 15) deeded to the DNR for a land navigation course and a rail spur with end and side loading ramps located ½ mile North of the cantonment area on DNR property.

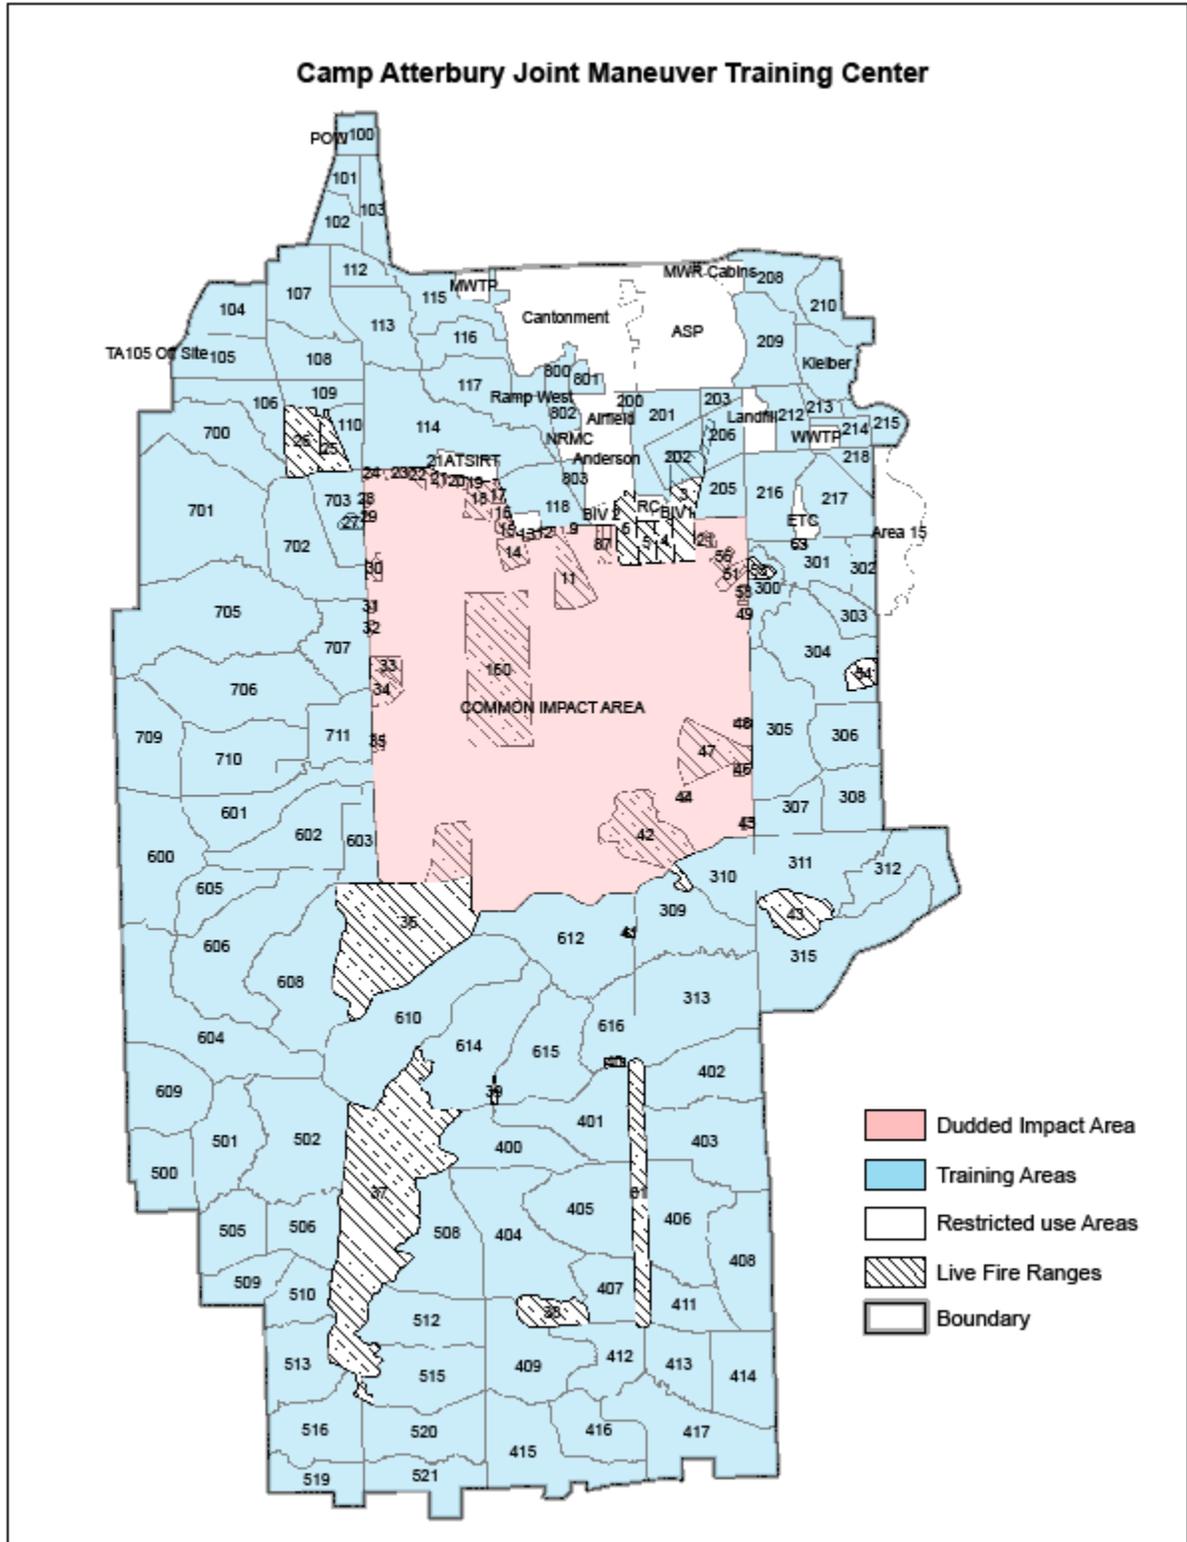

The INARNG has two recognized LTAs. Camp Fowler, located in Frankfort, Indiana. It consists of an additional 0.42 km² (105 acres), of which 0.40 km² (100 acres) are available for limited training activities. Muscatatuck Urban Training Center, located near Butlerville, IN. It consists of 3.88 km² (960 acres) with 68 buildings from 1 to 5 stories. Exhibit 5.1 shows the location of the LTAs in relation to both Camp Atterbury and the units associated with the INARNG. Exhibit 5.2, Camp Atterbury Training Area Map, INARNG, portrays the training area available at Camp Atterbury.
